About Sunflower

Sunflower Corporation was established in 1973, as a manufacturer of interior decorative panels, High Pressure Laminates (HPL), Melamine Faced Chipboard (MFC), Postforming HPL and Compact Laminates. Sunflower became the first ISO9001 accredited producer in the region and was further awarded the "Green Label" certification by the Taiwanese and Singaporean Governments.

Further technical advancements had taken place with the introduction of anti bacterial and fire retardant laminates. More recently new technologies were introduced that provide a far superior scratch resistant gloss and anti finger print ultra matt finishes in both high pressure and compact laminates.

Sunflower Corporation is dedicated in providing a creative, comprehensive and technically advanced interior design solutions. With an extensive and diverse design collection, in excess of 400 shades and with over 20 surface finishes, you can create your "own design solution" for your project.

Sunflower has numerous offices positioned strategically throughout Taiwan to comprehensively service the domestic market. In addition we have a global presence that includes South East Asia, Australia, New Zealand and the Middle East. At the same time Sunflower is seeking to build valuable and long term relationships with reputable distributors to further expand our business activities globally.

Technical Certifications

Sunflower HPL meets the following certification standards

- 1.ISO 9001:2015
- 2.CNS 11366
- 3.BS EN 438 (UK & EEC countries)
- 4.NEMA LD3-1995(USA)
- 5.JIS K-6902/6903 (Japan)
- 6.GB 50222-95 (China)
- 7.Taiwan-made Product MIT
- 8.Green Building Material mark by Architecture and Building Research Institute
- 9.International Maritime Organization

Special grade high pressure laminate technical specifications

- 1.Fire Retardant Grade -CNS7614 A3125 (Grade 1)
- 2.Antibacteria Grade - JIS Z2801:2000 (Japan)
- 3.ASTM related tests

Standard stock size : 4 8 4 'x8' Standard Grade (1220x2440mm)

MFC Available for Melamine Faced Chipboard

Woodgrain Direction : (C): Cathedral

Products

Soft Touch – Ultra Matt finish

Unlike most other manufacturers, Sunflower has recently developed their own "Surface Delivery Technology" to produce an anti fingerprint laminate that is soft to touch and is anti glare. Sunflower is the first to introduce this as post formable which makes it unique. It provides a very soft, tactile and natural look when used on woodgrain and marble designs and in fact on any colour within the Sunflower range.

Safeguard – Antimicrobial

Safeguard provides the latest in antimicrobial surface technology. This effectively inhibits bacterial and fungal growth while maintaining the original physical and structural properties of the products. It is available in HPL and Compact upon request and comes as standard in MFC. Safeguard complies with the JIS Z 2801 standard and is available in all colors and surface finishes in the Sunflower's range.

Metallic HPL

Metallic HPL is manufactured using an actual aluminum layer over treated papers. It is an effective way of achieving a metallic look without the associated costs of solid aluminium. As the aluminium foil is treated with a melamine resin it provides a light scratch resistance. Because it is made as HPL it is easy to fabricate and install with normal woodworking tools. Sunflower provides a wide range of colors to choose from that includes rose gold, bronze, grey, gold and brushed aluminium.

Uni-Core – Solid Colour Core HPL

Uni – Core provides an homogeneous solid colour, having the same colour on the decorative surfaces as the core, This provides a look of perfect uniformity and is visually seamless without the black lines of normal HPL. It can provide unique design possibilities for your project and is ideal for countertops, reception areas, desks and anywhere that requires that creative element.
