About Sunflower

Sunflower Corporation was established in 1973, as a manufacturer of interior decorative panels, High Pressure Laminates (HPL), Melamine Faced Chipboard (MFC), Postforming HPL and Compact Laminates. Sunflower became the first ISO9001 accredited producer in the region and was further awarded the “Green Label” certification by the Taiwanese and Singaporean Governments.

Further technical advancements had taken place with the introduction of anti bacterial, anti fungal and fire retardant laminates. More recently new technologies were introduced that provide a far superior scratch resistant gloss and anti finger print ultra matt finishes in both high pressure and compact laminates.

Sunflower Corporation is dedicated in providing a creative, comprehensive and technically advanced interior design solution. With an extensive and diverse design collection, in excess of 400 shades and with over 20 surface finishes, you can create your “own design solution” for your project.

Sunflower has numerous offices positioned strategically throughout Taiwan to comprehensively service the domestic market. In addition we have a global presence that includes South East Asia, Australia, New Zealand and the Middle East. At the same time Sunflower is seeking to build valuable and long term relationships with reputable distributors to further expand our business activities globally.

Technical Specifications & Certifications

High pressure laminate certifications

1. ISO 9001:2015
2. CNS 11366
3. BS EN 438(UK&EEC countries)
4. NEMA LD3-1991
5. JIS K-6902/6903(Japan)
6. GB 50222-95(China)
7. Taiwan-made Product MIT
8. Green Building Material mark by Architecture and Building Research Institute
9. International Maritime Organization
10. Antifungal Grade - ASTM G21 (excl. Metallic HPL)
11. Antibacterial Grade - JIS Z 2801(Japan) (excl. Metallic HPL)

Special grade high pressure laminate technical specifications

1. GB 18580-2001(China)
2. Fire Retardant Grade - CNS7614
3. ASTM related tests

Products

Design Director: Ian Chen

Antibacterial and Antifungal Technology

Sunflower provides the latest antibacterial and antifungal surface technology in its high pressure laminates (HPL) and Melamine Faced Chipboard (MFC). We do this during the manufacturing process by infusing the antibacterial and antifungal treatment while treating the papers. It effectively inhibits the growth of stain and odor causing bacteria and fungus, while maintaining the original physical and structural properties of the products. The effect is sustained throughout the life of the product and is unaffected from cleaning and frequent use. Sunflower incorporates this treatment in all its standard MFC and HPL products, in all colors and surface finishes (excluding Metallic HPL) and complies with the JIS Z 2801 standard (antibacterial) and ASTM G21 (antibacterial).

Project source: Steady Studio Interior Design

Soft Touch – Ultra Matt finish

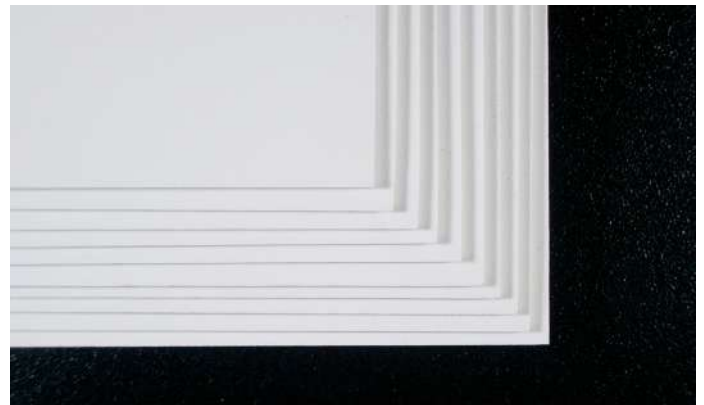

Sunflower has developed their own “Surface Delivery Technology” to produce an anti fingerprint laminate that is soft to touch and is anti glare. Sunflower is the first to introduce this as post formable which makes it unique. It provides a very soft, tactile and natural look when used on woodgrain and marble designs and in fact on any color within the Sunflower range.

Project source: Ding Bau Design

Metallic HPL

Metallic HPL is manufactured using an actual aluminum layer over treated papers. It is an effective way of achieving a metallic look without the associated costs of solid aluminium. As the aluminium foil is treated with a melamine resin it provides a light scratch resistance. Because it is made as HPL it is easy to fabricate and install with normal woodworking tools. Sunflower provides a wide range of colors to choose from that includes rose gold, bronze, grey, gold and brushed aluminium.

Uni-Core – Solid Color Core HPL

Uni – Core provides a homogeneous solid color, having the same color on the decorative surfaces as the core. This provides a look of perfect uniformity and is visually seamless without the black lines of normal HPL. It can provide unique design possibilities for your project and is ideal for countertops, reception areas, desks and anywhere that requires that creative elements.

Product Code

9037L
Oak(C)
4 8 **MFC**

- Color code & Surface finish
- Underlined: available for the same colors of edge banding
- Name & Woodgrain direction
- Size and available for the same colors of MFC (Melamine Faced Chipboard)

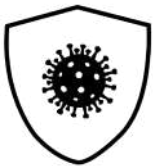

Woodgrain Direction:

(C):Cathedral (S):Straight (H): Horizontal (CF):Crossfire (B):Brul

Standard Grade:

4 8 4'x8' (1220x2440mm) **5* 2** 5'3"x12' (1600x3660mm)

Product Features

Antifungal &
Antibacterial

Fire Retardant

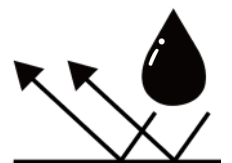

Easy to clean

Abrasion Resistance

Easy to install
